

Quick observations and review after my experience developing on all 3 major cloud services. Opinion of why AWS is leading? Likely a mix of base they are leading they can invite in this WHY and continue to exponentially dominate and maybe these practices led to the dominance in the first place.

Brief Review & Comparisons things to look for when evaluating

AWS	GCP	Azure	Category
Excellent	Good	Good - cool recommend system	✦ Cost/billing
Great	Great	Ok to not so good	✦ Documentation
On the way to Great	UI for per project , took much White and clunky menu	Multiple Dashboards, overall harder to use	✦ Usable / nice UI
Cloud Formation	Cloud Deployment Manager	Azure Resource Manager	Infrastructure as Code Name
